

### HDMI Signal Booster - 115 ft - 1080p

StarTech ID: HDBOOST

This HDMI signal booster lets you increase the signal strength of your HDMI video source so you can connect an HDMI display up to 115 ft. (35 m) away, using standard HDMI cables. You can place the booster inline between two HDMI cables, up to 82 ft. in length at the video input, and up to 33 ft. in length at the video output.

#### Discreet installation

With its small form factor, the HDMI booster is easy to hide, for a discreet installation. You don't need an external power adapter to operate the signal booster, and it includes mounting hardware, so installing it is hassle-free. By extending your video signal using standard HDMI cables, the HDMI booster is a cost-effective alternative to more expensive HDMI extension systems that require the installation of CAT5 or CAT6 cabling infrastructure.

# Compatible with varying distances

The HDMI booster features an equalization switch with ten different levels. The equalization switch lets you adjust the amplification of your HDMI signal based on the distance of your cables, so that you can ensure your HDMI signal will be perfect even at distances up to 115 ft. (35 m). The booster is perfect for boardrooms, offices or classrooms that may require varying distances depending on the room size.

## Maintains high-definition video signals

When extending HDMI over long distances using standard video cabling, higher resolutions can become

## Spec Sheet

unavailable. Using the HDMI signal booster ensures that you'll still be able to depend on high-definition resolutions up to 1080p at 60Hz.

The HDBOOST is backed by a 2-year StarTech.com warranty and free lifetime technical support.

#### **Applications**

- Avoid running network cabling to extend video signals, by using this booster with standard HDMI cabling
- Boost the signal strength of your HDMI video signals for classroom, office or boardroom displays

#### **Features**

- Discreet installation with a small form factor and no external power adapter
- Works at varying distances up to 115 ft. with a built-in equalization switch
- Maintain high-definition resolutions up to 1080p
- Supports 7.1 surround sound audio
- Mounting hardware included

#### **Technical Specifications**

Warranty 2 Years
Audio Yes
Cabling HDMI
Rack-Mountable Yes

Audio Specifications 7.1 surround Sound

Max Distance 35 m / 115 ft
Maximum Cable 114.8 ft [35 m]

Length

Maximum Digital 1920 x 1080 at 60Hz

Resolutions

Supported Resolutions 1920 x 1080, 1680 x 1050, 1600 x 900, 1440 x 900, 1360 x 768, 1280 x 800, 1280 x

768, 1280 × 720

Wide Screen Yes

Supported

Connector A 1 - HDMI (19 pin) Female Input
Connector B 1 - HDMI (19 pin) Female Output

Connector B 1 - HDMI (19 pin) Female Output

System and Cable The HDMI cable connected to your video source must be longer or equal to the length

Requirements of the cable connected to your display.

System and Cable

Requirements

The maximum supported video source cable length is 82 ft. (25m).

System and Cable

Requirements

The maximum supported display cable length is 33 ft. (10m).
